Education

University of Engineering and Technology, Vietnam National University   Hanoi, Vietnam
Major: Information Technology   Aug 2018 - Jun 2022
Grade: High Distinction (GPA: 3.62/4)

Objective

I am a Full-Stack Developer with over 04 years of experience, specializing in React.js, Node.js, and Go since January 2020. I have also worked with frameworks like Next.js and Nest.js, and I am skilled in building cross-platform mobile apps using Flutter. Although I can work on both the front-end and back-end, my main focus is on front-end development. I am passionate about creating interfaces that are not only functional and user-friendly but also visually appealing. I am always eager to learn new technologies, take on new challenges, and work with others in the industry. I am open to new opportunities and collaborations.

Experience

Teko Vietnam Technology Joint Stock Company   Hanoi, Vietnam
Software Engineer   Feb 2022 - Present
- Worked as part of an agile team, closely collaborating with product managers, designers, and technical leads to ideate, prototype, build, and test new products or features.
- Ensured clean and reusable code by writing unit and functional tests, continually increasing code quality.
- Collaborated with the team through discussions and brainstorming to make technical decisions.
- Reviewed code to learn and understand every piece of the system, ensuring the best code quality as a team.
- Raised standards, learned new things, and shared knowledge with the team to promote team growth.
- Took ownership of the product, constantly finding ways to improve its design, system maintainability, performance, and reliability.
- Monitored and troubleshooted application or system issues by deep diving into technical problems.

Sao Khue Software and Solutions Ltd   Hanoi, Vietnam
Full-stack Developer   Jan 2020 - Jan 2022
- Programmed web application software (Frontend and Backend).
- Designed prototypes for apps and websites.
- Maintained and updated existing websites.
- Assisted end-users in solving operating problems.
- Participated in client discussions.

Projects

Tempi.vn   2022 - Present

Customer: VNLIFE Corporation Joint Stock Company
Description: Tempi.vn is a platform for designing professional landing pages with drag-and-drop features for various advertising campaigns. The platform allows users to create landing pages quickly without coding skills, offers various templates, and provides analytics tools to optimize page performance.
Team size: 8
Role: Software Engineer
Technologies: React, Next.js, Go, Node.js, NestJS, MySQL, Kubernetes
Responsibilities: Development, design prototypes, propose ideas, optimize code, fix bugs, and perform testing.
Reference: https://tempi.vn

Hoclieu.vn   2020 - 2022

Customer: Vietnam Education Publishing House
Description: Hoclieu.vn is an educational system for students to revise and learn with dynamic data and animations, available on both web and mobile platforms. The system transforms paper-based K12 textbooks into interactive books for teachers to assign exercises and students to self-test.
Team size: 6 (core members) + 10
Role: Full-stack Developer, I am one of 6 core members
Technologies: ReactJS, ASP.NET Core (C#), MySQL
Responsibilities: Development, design prototypes, propose ideas, optimize code, fix bugs, and perform testing.
Reference: https://hoclieu.vn

IPAY   Aug 2020 - Nov 2020

Customer: Sao Khue Software and Solutions Ltd
Description: IPAY is a multi-tenant payment intermediary system connecting banks and merchants. It allows merchants to create and manage payment and collection processes while integrating with banks' APIs to handle transactions.
Role: Frontend Developer
Technologies: ReactJS, ASP.NET Core (C#)
Responsibilities: Development, code optimization, and bugs fixing.

EasyAccomod   Nov 2020 - Jan 2021

Customer: For study purpose
Description: EasyAccomod is an accommodation search system that serves both property owners and renters. It allows owners to post rental information and renters to find suitable accommodations based on their needs.
Role: Frontend Developer
Technologies: ReactJS, ASP.NET Core (C#), MySQL
Responsibilities: Development, code optimization, and bug fixing.
Reference: https://github.com/NoCtrlZ1110/EasyAccommod

Job Finding System   Apr 2020 - Jul 2020

Customer: For study purpose
Description: The Job Finding System connects job seekers and employers. Candidates can create profiles and apply

for jobs, while recruiters can post job listings and review applications.
Role: Full-stack Developer
Technologies: ReactJS, Node.js, MySQL
Responsibilities: Development, testing, and bug fixing.

SGUET News   May 2020 - Aug 2020

Customer: Support Group University of Engineering and Technology, VNU (SGUET)
Description: SGUET News is a tool that helps the SGUET fan page's admin/editor create UET news images automatically. The images are used in news update posts for UET students.
Role: Full-stack Developer
Technologies: ReactJS, Node.js
Responsibilities: Development and testing.
Reference: https://noctrlz1110.github.io/sguet-news/

UET - Get News   May 2020 - Aug 2020

Customer: Support Group University of Engineering and Technology, VNU (SGUET)
Description: UET - Get News is a chatbot on the Messenger platform that notifies subscribed users about new posts on the UET website. It also tracks real-time COVID-19 statistics and sends notifications to users.
Role: Backend Developer
Technologies: Node.js
Responsibilities: Development and testing.
Reference: https://www.facebook.com/UETgetNews/

E-Garden   Oct 2020 - Dec 2020

Customer: For study purpose
Description: E-Garden is a mobile app for learning English, aimed at students from grades 1 to 12. The app helps students develop skills in vocabulary, grammar, and listening through games and interactive learning methods.
Role: Frontend Developer
Technologies: Flutter (Dart), ASP .NET Core (C#), SQL Server
Responsibilities: Development, code optimization, and bug fixing.
Reference: https://github.com/NoCtrlZ1110/E-Garden

Meet Up   May 2021 - July 2021

Customer: For study purpose
Description: Meet Up is a mobile app that helps users find the best location to meet up. It uses location data to suggest meeting points that are convenient for all parties involved.
Role: Frontend Developer
Technologies: Flutter (Dart), Node.js
